EXECUTIVE SUMMARY

Full Stack Software Engineer specializing in backend systems, distributed APIs, and cloud-based architectures. Proven track record of improving system performance, resolving complex production issues, and delivering high-impact features using Java/Spring and AWS.

PROFESSIONAL EXPERIENCE

DATASERV

REMOTE

Full Stack Developer I

Feb 2026 – Present

- Designed and implemented an asynchronous retry system for invoice, purchase order, and receipt matching workflows, eliminating reliance on scheduled jobs and enabling immediate recovery of failed transactions in production systems
- Optimized database query performance using targeted indexing strategies, reducing document API response times from ~4.6s to ~0.5s (~89%), significantly improving user-facing latency
- Built an in-app notification system to surface real-time workflow status updates, improving user visibility and reducing reliance on delayed system refresh cycles

Developer II

Nov 2024 – Feb 2026

- Led migration from Zuul to Spring Cloud Gateway, centralizing routing, authentication, and observability for distributed services handling ~3K requests/min with ~160ms average latency, improving system scalability and maintainability
- Redesigned and optimized a legacy license usage calculation pipeline by migrating from memory-bound batch processing to a streaming data model, reducing computation time from ~8 hours to ~30 minutes for large client datasets
- Identified and mitigated a third-party memory leak by profiling heap usage and isolating iframe retention behavior, reducing memory growth from ~1GB to <300MB under repeated usage (100+ cycles), eliminating browser OOM crashes
- Developed shared libraries and automated test suites, reducing defects across multiple services and improving code consistency across backend systems

DevOps Intern

Jun 2023 – Dec 2024

- Rolling out new import solutions for 20+ clients, enhancing efficiency by modifying shell scripts to transfer files to AWS S3 and updating job scheduler parameters to use a new API endpoint.
- Built Python-based test data generation tools, accelerating QA validation cycles and improving test coverage for data ingestion workflows

INSURANCE AUTO AUCTIONS

WESTCHESTER, ILLINOIS

Business Technology Intern

Jun 2022 – Jul 2022, Dec 2022 – Feb 2023

- Developed a REST API for generating client metric reports using ASP.NET MVC, C#, and T-SQL, improving data accessibility and reducing manual reporting effort
- Conducted QA testing on business rule engines for vehicle title and registration workflows, ensuring correctness across complex edge cases

PROJECTS

SAHIB AL-QURAN

CHICAGO, ILLINOIS

Web Application

Sep 2022 – Present

- Built and deployed a full-stack SvelteKit application supporting 50+ active users, enabling structured learning through progress tracking, task generation, and goal management
- Architected a serverless backend using Firebase Cloud Functions, ensuring automatic scaling and low operational overhead
- Delivered full end-to-end implementation across frontend, backend, and deployment

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

CHICAGO, ILLINOIS

Master of Applied Science, Artificial Intelligence, GPA 3.90

AUG 2022 – May 2024

Bachelor of Science, Computer Science, GPA 3.85

AUG 2020 – May 2024

- Achievements:** Summa Cum Laude, Dean's List for Excellent Scholarly Achievement

TECHNICAL SKILLS

Java, Python, C#, TypeScript | Spring Boot, Spring Cloud, .NET Core, React, SvelteKit | TensorFlow, PyTorch, Claude, GitHub Copilot | SQL Server, MongoDB, AWS | Agile & Team Leadership
