PROFESSIONAL EXPERIENCE

DATASERV

REMOTE

Full Stack Developer I

Feb 2026 – Present

- Enhance external API performance and platform integration.
- Leverage AI tools (Claude, GitHub Copilot) to accelerate development, improve code quality, and streamline documentation.
- Deliver end-to-end feature development and production issue resolution for high reliability.

Developer II

Nov 2024 – Feb 2026

- Led API platform development: OAuth2 client credentials, audit history, CRUD endpoints, Swagger documentation.
- Upgraded gateway/infrastructure: migrated from Zuul to Spring Cloud Gateway, enforced JWT and CSP, externalized configuration.
- Resolved critical production issues (memory, document rendering, data sync), improving platform stability.
- Developed shared libraries and automated tests, reducing defects and boosting maintainability.
- Achieved highest team development throughput with strong code quality.

Development Operations Intern

Jun 2023 – Dec 2024

- Rolled out new import solutions for 20+ clients, enhancing efficiency by modifying shell scripts to transfer files to AWS S3 and updating job scheduler parameters to use a new API endpoint.
- Created Python scripts for generating dummy data, streamlining testing and verification processes for import solutions.

INSURANCE AUTO AUCTIONS

WESTCHESTER, ILLINOIS

Business Technology Intern

Jun 2022 – Jul 2022, Dec 2022 – Feb 2023

- Developed a REST API to streamline the generation of client metric reports, delivering easy-to-read, spreadsheet-ready formats using ASP.NET MVC, C#, and T-SQL for improved data accessibility.
- Conducted QA testing for business rule engine implementation on vehicle title and registration forms, ensuring accuracy and compliance with company standards.

PROJECTS

SAHIB AL-QURAN

CHICAGO, ILLINOIS

Web Application

Sep 2022 – Present

- Designed and developed a SvelteKit web application to advance Quranic studies for students and teachers, featuring progress tracking, daily task generation, and goal-setting tools to foster consistent learning.
- Deployed on Firebase with Cloud Functions, enabling automatic scaling and serverless backend.
- Utilized MongoDB for data storage and Prisma for efficient data management, complex queries, and rapid data retrieval.
- Achieved 40+ active users at the Mosque Foundation Education Center, enhancing access to personalized Quranic study resources.

JEN

CHICAGO, ILLINOIS

Multiplayer Video Game

Dec 2021 – Jun 2022

- Developed a multiplayer turn-based strategy game using Unity and C#, incorporating simple yet visually engaging game entities modeled in Blender.
- Explored AI control through a minimax algorithm and identified potential for reinforcement learning with neural networks to enhance strategic performance.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

CHICAGO, ILLINOIS

Master of Applied Science, Artificial Intelligence, GPA 3.90

AUG 2022 – May 2024

Bachelor of Science, Computer Science, GPA 3.85

AUG 2020 – May 2024

- **Achievements:** Summa Cum Laude, Dean's List for Excellent Scholarly Achievement

SKILLS

Java, Python, C#, TypeScript | Spring Boot, Spring Cloud, .NET Core, React, SvelteKit | TensorFlow, PyTorch, Claude, GitHub Copilot | SQL Server, MongoDB, AWS | Agile & Team Leadership
